

Module top

Rev F concept geometry / nominal mm

DISPLAY MODULE / TOP VIEW

Window and top button in the current parametric assembly.

24 x 24 active display area

Screen and window sizes are concept parameters; readability is unverified.

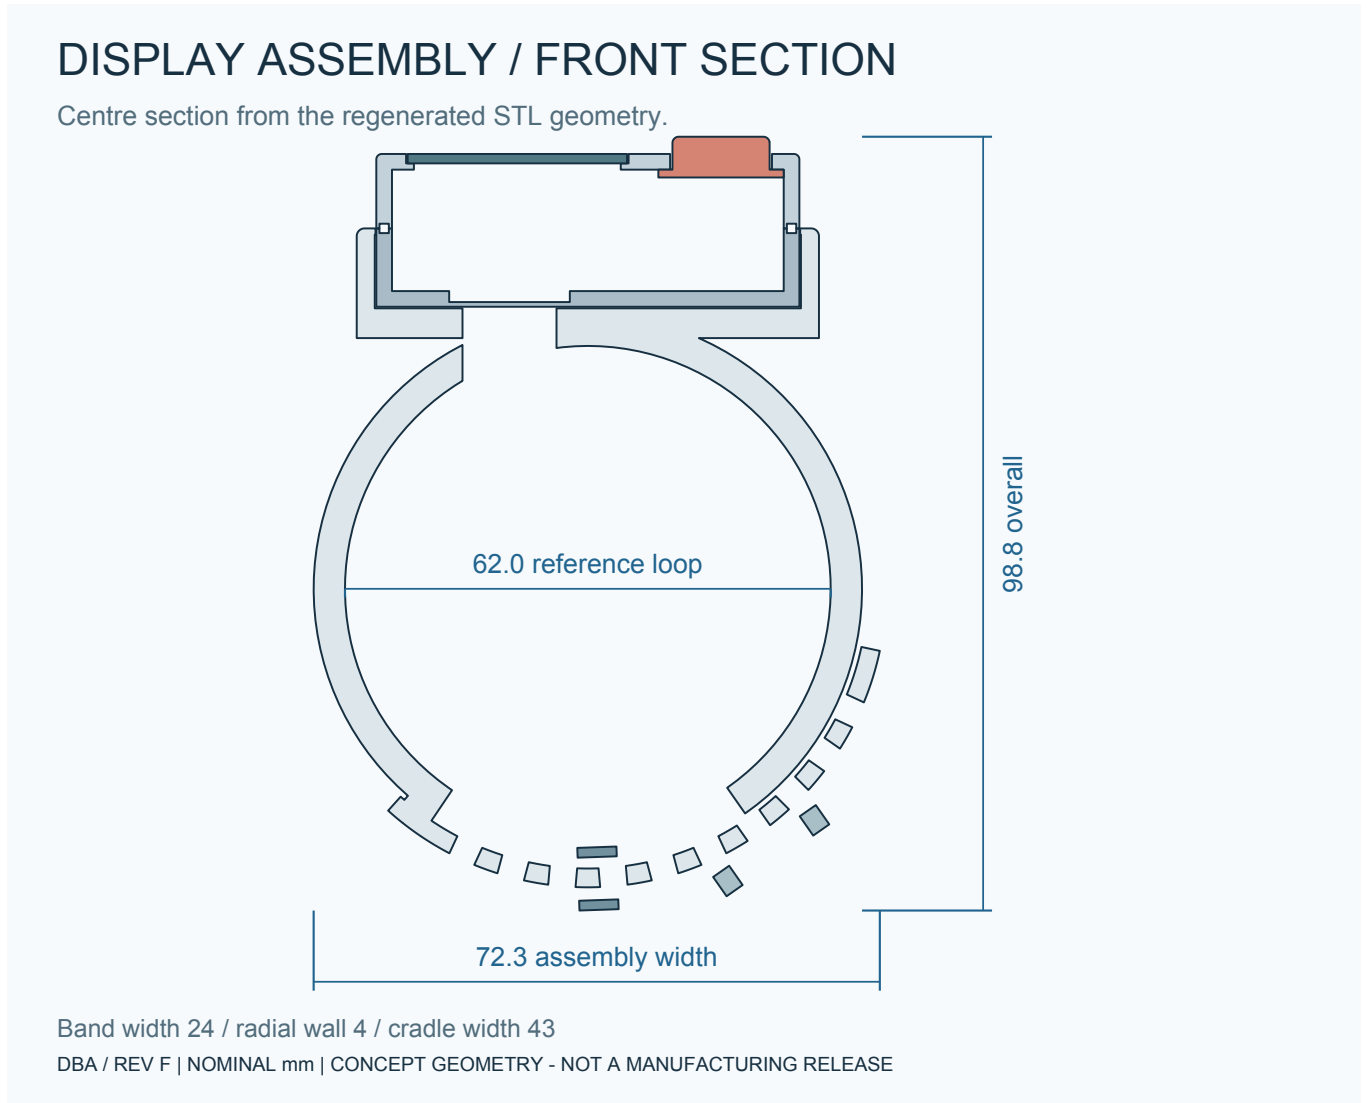

DBA / REV F | NOMINAL mm | CONCEPT GEOMETRY - NOT A MANUFACTURING RELEASE

Nominal housing, display window and top button.

Dimensions describe concept envelopes, not a manufacturing release. No pressure, acoustic, fit or structural performance is established.

Regular strap assembly

Rev F concept geometry / nominal mm

Current CAD centre section. Assembly width includes the overlap-tail geometry.

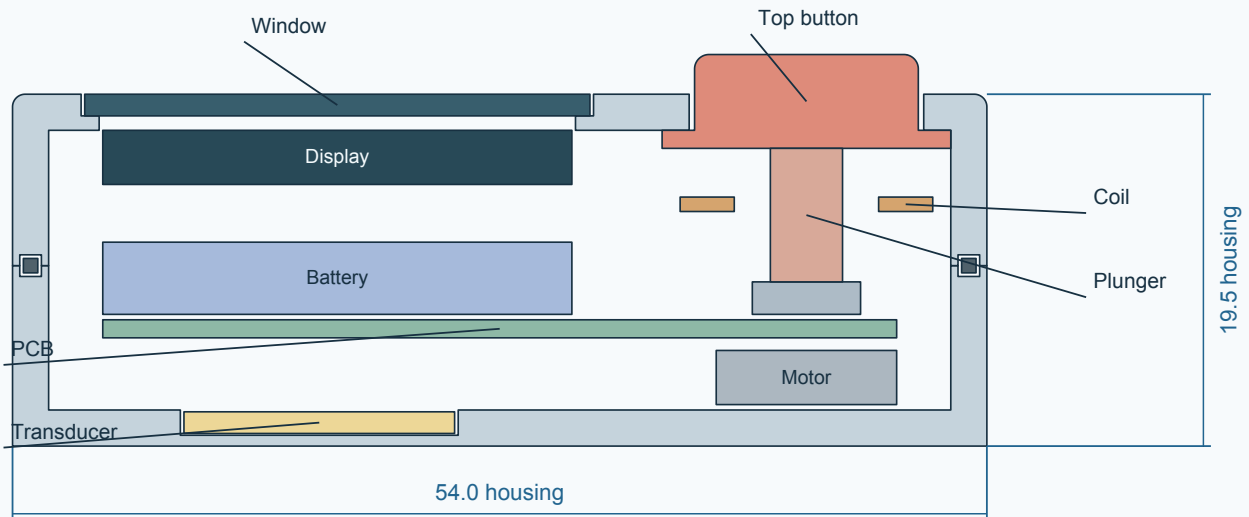

Dimensions describe concept envelopes, not a manufacturing release. No pressure, acoustic, fit or structural performance is established.

Module section

Rev F concept geometry / nominal mm

DISPLAY MODULE / CENTRE SECTION

Current STL section. Color identifies component envelopes.

Coil is beneath the button side of the cap; the plunger passes through its centre opening.

Nominal clearances are modeled. Wiring, supports, sealing and charging efficiency remain undefined.

DBA / REV F | NOMINAL mm | CONCEPT GEOMETRY - NOT A MANUFACTURING RELEASE

Display and coil occupy separate lateral envelopes; the top button has a separate plunger.

Dimensions describe concept envelopes, not a manufacturing release. No pressure, acoustic, fit or structural performance is established.

Internal sensor layout

Rev F concept geometry / nominal mm

INTERNAL LAYOUT / CAP REMOVED

Plan projection of selected component envelopes; depths differ.

05 PCB · 07 Battery · 12 Display · 17 Pressure sensor · 18 Heading / inertial sensor

Pressure coupling, wiring, mounting and actual component selections remain undefined.

The external acoustic reference is a system proposal; no fabricated array CAD is supplied.

DBA / REV F | NOMINAL mm | CONCEPT GEOMETRY - NOT A MANUFACTURING RELEASE

Pressure and heading sensor envelopes are shown in plan; actual devices and their interfaces remain unselected.

Dimensions describe concept envelopes, not a manufacturing release. No pressure, acoustic, fit or structural performance is established.

Three adjustable strap layouts

Rev F concept geometry / nominal mm

Reference diameters of 50, 62 and 78 mm. Buckle, tail and keeper are modeled; wearer-fit ranges are unverified.

Dimensions describe concept envelopes, not a manufacturing release. No pressure, acoustic, fit or structural performance is established.
